1. The Hook & The Pre-Court Crisis 0:00 – 0:25 (25s)

STAGE & SCREEN

Stand tall, maintain confident eye contact with evaluators. Show the NYAYI official landing screen.

WHAT YOU SAY WORD-FOR-WORD:

"Good morning everyone. I'm **Farhan Khan**, Founder and Lead Architect of **NYAYI**.

In India today, over **5 crore cases** are clogged in courtrooms. But the deeper, silent crisis happens *before* court: when an ordinary citizen faces a dispute — an unpaid security deposit, consumer fraud, or an unfair police notice — they are paralyzed by fear, confusing legal jargon, and unaffordable lawyer fees.

Compounding this crisis, India has made the historic transition to brand-new criminal codes — the **BNS, BNSS, and BSA**. As a result, 1.4 billion citizens are practically left in the dark about their actual legal standing."

2. Introducing NYAYI — The Solution 0:25 – 0:50 (25s)

SCREEN ACTION

Switch cleanly to the live, running AI portal at <https://ai.nyayi.in>.

WHAT YOU SAY WORD-FOR-WORD:

"To bridge this justice divide, we engineered **NYAYI (न्यायी)** — India's first bilingual, real-time AI Legal Intelligence Platform.

NYAYI is not a generic ChatGPT wrapper. It is an end-to-end, statute-grounded legal companion built specifically for the Indian legal framework. It translates complex legal provisions into crystal-clear, actionable roadmaps in **Hindi, English, and natural conversational Hinglish**, strictly grounded in verified Indian statutes."

3. Prototype Demo Setup — The Magic Moment 0:50 – 1:35 (45s)

LIVE INTERACTION

Tap the Voice Mic Orb or paste the pre-copied citizen dilemma directly into the chat input:

User Prompt: "Mera landlord security deposit wapas nahi de raha, police complaint kar sakte hain kya?"

Pro-Tip for Farhan: Keep this exact query copied on your clipboard (Ctrl + C) beforehand. If ambient noise interferes with speech recognition, instantly paste it (Ctrl + V) and hit Enter. The AI response generates within sub-seconds.

WHAT YOU SAY WHILE POINTING TO THE SCREEN:

"Let me demonstrate our live prototype in real-time. I've submitted a common citizen dilemma in natural, everyday Hinglish.

Notice what NYAYI delivers in less than two seconds:

- 1. Instant Legal Diagnosis:** It accurately classifies this as a civil breach of contract under Section 73, while identifying whether criminal breach of trust under **Section 316 BNS** applies.
- 2. Automatic Statute Transition:** It maps the old IPC provisions to the new Bharatiya Nyaya Sanhita so the citizen knows the current law.
- 3. Actionable 4-Step Roadmap:** Instead of legal theories, it gives the citizen a concrete roadmap: issuing an evidentiary legal notice, preserving rental receipts, and filing before the Consumer Dispute Redressal Commission."

4. Technical Architecture & Trust Engines 1:35 – 1:50 (15s)

ARCHITECTURE CALLOUT Highlight the clean UI, Voice Synthesis toggle, and 256-Bit SSL Auth footer badge.

WHAT YOU SAY WORD-FOR-WORD:

"Under the hood, NYAYI utilizes ultra-low latency Groq inference pipelines with hardened system guardrails to eliminate legal hallucination. We have built real OAuth and OTP verification, persistent case memory, and a localized hands-free voice studio designed for every Indian, regardless of technical literacy."

5. The Visionary Closing 1:50 – 2:00 (10s)

FINAL PUNCHLINE (LOOK DIRECTLY AT THE JUDGES):

"Justice should never be a luxury reserved only for those who can afford expensive retainers. With NYAYI, we are putting constitutional confidence and reliable legal empowerment directly into the pocket of every Indian citizen.

Thank you, and I am excited to demonstrate any feature live or answer your questions."

Evaluator Defense: Quick Q&A Cheat Sheet

PROBABLE JUDGE QUESTION	FARHAN'S EXACT STRONG ANSWER
"How is this different from ChatGPT?"	ChatGPT gives generic, verbose text often hallucinating US/UK law. NYAYI uses strict Indian statutory grounding (BNS/BNSS/BSA), provides practical procedural steps, supports bilingual voice, and includes persistent user case memory.
"Are you legally liable for wrong advice?"	NYAYI serves as a <i>Legal Intelligence Assistant</i> for legal literacy and preliminary guidance, clearly disclaiming that it does not replace an advocate-client relationship, compliant with Bar Council guidelines.
"How will an illiterate villager use this?"	Through our hands-free bilingual Voice Studio. A citizen can speak in pure Hindi or regional accents, listen to synthesized spoken audio, and understand their rights without typing a single word.
