

Swapna's Presentation Objectives

Deliver an engaging, highly relatable pitch that explains **what NYAYI is**, **the citizen problems we solved**, and **how anyone can use our features** effortlessly. Speak naturally, maintain eye contact, and follow the highlighted speaking boxes.

1. The Opening Hook (0:00 - 1:00)

WHAT YOU SAY:

"Good morning respected judges, mentors, and everyone present here today. My name is **Swapna**, and today our team is thrilled to present **NYAYI**—our AI-powered citizen justice and legal literacy platform."

PAUSE 2 SECONDS

WARM SMILE

"Let me begin with a simple question: Have you, a friend, or a family member ever had a landlord refuse to return your rental deposit? Or had your hard-earned money wiped out by an online cyber scam? Or maybe felt terrified just thinking about going to a police station to file an FIR?"

"For over **80% of our country's population**, the law is not a shield—it is a terrifying black box. Today, we are opening that black box with **NYAYI**."

2. The Exact Problems We Fixed (1:00 - 2:15)

WHAT YOU SAY:

"Before building NYAYI, our team researched why ordinary people give up on legal justice. We identified **four critical barriers** that we set out to eliminate:"

1. The Cost Barrier

Lawyers charge ₹2,000 to ₹10,000 just for a 20-minute preliminary talk to answer basic questions like *'Do I have a valid case?'*

2. The Jargon Barrier

Acts are written in centuries-old archaic legal Latin. Common citizens cannot decipher what their fundamental rights actually are.

3. The BNS 2023 Confusion

India replaced the 160-year-old IPC with the new Bharatiya Nyaya Sanhita. Even law students and police officers are confused about new section numbers.

4. Panic in Emergencies

In crisis moments (domestic abuse, cyber fraud, accidents), people freeze and don't know who to call or what evidence to save.

3. What is NYAYI? The Solution (2:15 - 3:00)

WHAT YOU SAY:

"**NYAYI**—which stands for *Justice Made Accessible*—is a dual-pillar platform designed so that any Indian citizen can understand their rights, navigate any legal scenario, and get instant guidance in plain, human words without paying a single rupee."

POINT TO SCREEN

"We structured NYAYI into two distinct, powerful pillars: **Pillar 1**: Our public Knowledge Portal at **nyayi.in**, and **Pillar 2**: Our interactive AI Assistant & Voice Studio at **ai.nyayi.in**."

4. Feature Walkthrough & Live Demo (3:00 - 5:30)

Follow these steps while demonstrating the live website on the projector:

DEMO 1: THE AI LEGAL ASSISTANT (AI.NYAYI.IN)

TYPE QUESTION: "MY LANDLORD CUT OFF WATER SUPPLY. WHAT CAN I DO?"

"Let's test our AI Studio. Notice how NYAYI doesn't give a cold, confusing quote from a textbook. It immediately breaks down the response into: **1) Your Immediate Rights:** Landlords cannot unlawfully disconnect essential amenities. **2) The Exact Law:** Section 430 of IPC / BNS provisions and state Rent Control Acts. **3) Step-by-Step Action:** How to send a formal written notice and approach the Rent Controller or Police."

DEMO 2: THE CONVERSATIONAL VOICE STUDIO

CLICK THE MICROPHONE ORB

"Now look at our Voice Studio. We recognized that millions of Indians prefer speaking over typing. But standard voice assistants interrupt you the moment you pause to think.

We fixed that completely! Our voice engine features **continuous listening with a 3.5-second natural silence timer**. Even better, look at this:"

TAP PAUSE ORB "I can tap **Pause** at any moment. The mic turns warm amber, saves my sentence, and lets me think without cutting me off. When I'm ready, I tap **Resume** or **Send**.

And once NYAYI speaks the answer, it doesn't vanish! The answer card stays on screen with **Replay** and **Copy** options."

DEMO 3: THE BNS 2023 CRIMINAL LAW BRIDGE

OPEN LAWS / BNS SECTION

"With the new criminal laws effective from July 2024, everyone is asking: *'Where did Section 420 or Section 302 go?'*

NYAYI features an instant concordance search. You type '*Cheating*' or '*420*', and NYAYI instantly shows you its exact equivalent in **Bharatiya Nyaya Sanhita Section 318**, explaining the penalty and bail status side-by-side."

DEMO 4: CITIZEN GUIDES, DICTIONARY & EMERGENCY SOS

SHOW SOS & DICTIONARY TABS

"Finally, on **nyayi.in**, we have over **1,400 laws and procedural guides**—how to file an FIR, consumer complaint, or cyber fraud report. Plus, a 1-tap **Emergency SOS Hub** connecting citizens directly to Police 112, Women Helpline 1091, and Cybercrime 1930."

5. Privacy & Ethical Guardrails (5:30 - 6:15)

WHAT YOU SAY:

"A critical pillar of NYAYI is our ethics:

- **Zero Data Selling:** User queries are completely private and session-isolated.
- **Statutory Disclaimer:** NYAYI is an informational legal literacy tool that empowers citizens with awareness. We always guide users to a registered advocate when courtroom litigation or formal representation is required."

6. Closing Statement (6:15 - 7:00)

WHAT YOU SAY:

"To conclude: An informed citizen is an empowered citizen. NYAYI bridges the gap between complex legal code and 1.4 billion people, making justice accessible, understandable, and free for every Indian.

PAUSE

CONFIDENT SMILE

Thank you very much. We are now open for your questions!"

7. Judge Q&A Cheat Sheet (How to Answer Hard Questions)

Q1: "How do you ensure the AI doesn't hallucinate fake laws?"

Swapna's Answer: "We use custom legal system prompts with strict grounding. NYAYI only cites verified sections from authentic Indian statutes (IPC, BNS, CrPC, BNSS, Consumer Protection Act) and clearly includes a disclaimer advising formal consultation for court filings."

Q2: "Are you trying to replace lawyers?"

Swapna's Answer: "Not at all! NYAYI is like a legal first-aid kit. In medicine, first-aid doesn't replace the doctor—it stabilizes the patient. NYAYI educates the citizen so when they meet a lawyer, they are prepared, confident, and know exactly what to ask."

Q3: "Can people who don't speak English use this?"

Swapna's Answer: "Yes! The AI assistant understands and responds in multiple Indian languages including Hindi, and our Voice Studio allows citizens to speak naturally without having to type complex terms."

Q4: "What is your tech stack?"

Swapna's Answer: "Our platform is built on modern web standards with Node.js and Express backend, Google Gemini Pro & Flash LLMs, Web Speech API with custom silence debounce algorithms, and high-performance CDN deployment."
